Prof. Dr. Morris Emma

Dr. Morris is a renowned Professor of Clinical Cell and Gene Therapy at UCL's Institute of Immunity & Transplantation. She is a leading expert in Haematopoietic Stem Cell Transplantation (HSCT) and serves as the Director of the Division of Infection and Immunity. Dr. Morris's research focuses on T cell immunology, gene therapy, and gene editing. She has made significant contributions to translational studies, ranging from animal models to Phase I clinical trials. Additionally, she is involved in charitable work as a patron of Haematology Cancer Care (HCC) and is a scientific founder of Quell Therapeutics Ltd, a UCL Spin-out company specializing in gene-engineered regulatory T cells.
