Dr. Leila Jeddane

Following the completion of her PhD in immunogenetics in Morocco, Dr. Jeddane has dedicated her career to the advancement of diagnosis and treatment for immune dysfunctions. Currently serving as a scientific manager at the esteemed Mohammed VI National Laboratory, she plays a pivotal role in overseeing specialised testing procedures, including diagnostic tests for immune dysfunctions. Notably, Dr. Jeddane holds the esteemed position of Immediate-Past President of the African Society for Immunodeficiencies, further exemplifying her commitment to driving progress in the field.
